Projects

AI-Powered HR Assistant Platform | [Take a look](#)

- AI chatbot that helps employees find answers about company policies and CAO rules, with HR staff able to join the chat when needed.

Technologies: C#, Entity Framework, SignalR, React, TypeScript, Tailwind CSS, Python, LlamaIndex, PostgreSQL, Docker.

Social Agenda Website | [GitHub Link](#)   C#, React, TypeScript

- Our team of 3 had a goal to create a 'social agenda' application that will make it easier to participate by events and know who's from your colleagues/friends does it as well.

CargoHub | [GitHub Link](#)   REST API, C#, Entity Framework

- Primary objectives were to analyse, test the existing product, identify areas for improvement, and implement optimizations. The result was a more efficient and maintainable codebase, aligned with better practices and requirements.

Skills

- **Programming Languages:** C# (.NET), Python, TypeScript
